To the Director, Office of Pesticide Programs,
United State Environmental Protection Agency

Concerns over use of glyphosate-based herbicides & risk associated
with exposure: A consensus statement

Complete paper attached

Dear Mr. Housenger,

The Maryland Pesticide Advisory Committee has asked that the Chemical Sensitivity Disorders Association transmit this consensus statement to you for review and comment. Our association presented the paper yesterday to the committee. We are eager to receive your comments on it, particularly those concerning glyphosate residues in food.

Appreciatively,
Lawrence A. Plumlee, M.D.,
President, Chemical Sensitivity Disorders Association
